SUMMARY

Backend engineer with 6 years building payment and data platforms.

EXPERIENCE

Senior Backend Engineer, Northwind Systems (2022-2026)

- Led migration of a monolith into 12 services, cutting deploy time 74% from 45 minutes to 12 minutes across 8 teams.
- Reduced p99 checkout latency from 820ms to 190ms by rewriting the settlement path and adding a write-through cache.
- Designed an idempotency layer that eliminated 99.8% of duplicate charges, saving an estimated \$310,000 in annual chargeback losses.
- Mentored 4 engineers; 2 were promoted within 18 months.

Backend Engineer, Cobalt Analytics (2019-2022)

- Built an ETL pipeline processing 40 million events per day on 3 nodes.
- Automated the regression suite, raising coverage from 31% to 88%.
- Negotiated a vendor contract that saved \$120,000 annually.
- Migrated 14 legacy cron jobs to an orchestrated DAG, removing 22 hours of manual operations work per month.
